

CORE COMPETENCIES

- ◆ **Website design and development:** hand-coded, mobile-first, high-performance sites built to load fast and last.
- ◆ **Accessibility compliance:** Section 508 and WCAG 2.1 AA design, audits, and remediation for public-facing sites.
- ◆ **Redesign and modernization:** migration of dated or unmaintained sites to secure, current platforms.
- ◆ **Maintenance and support:** content updates, security patching, uptime, and ongoing site management.
- ◆ **Search and digital presence:** local SEO, structured data, and Google Business Profile setup.
- ◆ **Brand and graphic design:** identity systems, layout, and digital collateral.

DIFFERENTIATORS

- ◆ **ADA Title II ready.** We help public entities meet the WCAG 2.1 AA standard the DOJ web rule requires, ahead of the April 2027 and April 2028 compliance deadlines.
- ◆ **Principal-led delivery.** You work directly with the designer and developer. No account-manager layers, faster decisions, faster turnaround.
- ◆ **Accessibility built in.** Every build targets Section 508 and WCAG 2.1 AA from the first line of code, not as a retrofit.
- ◆ **Built, not assembled.** Lightweight hand-coded sites instead of bloated templates: better performance and lower long-term cost of ownership.
- ◆ **Texas-based and responsive.** DFW Metroplex location for regional, state, and local engagements.

PAST PERFORMANCE

Concerto

Design and development of a live-events technology platform, web and mobile.

Rochier Contracting

Website design and digital presence for a Texas construction and contracting firm.

Hearten Home Interiors

Brand-aligned website for a DFW interior design studio.
